

Assembly and set-up of the artwork

The installation is located in a squared room. Its dimensions can range from 5m to 20m wide. In the middle of the room, a computer is placed hidden under a white box (height: 20cm, width: 40cm, depth: 30cm). Above the box, a pair of headphones with the micro-object on it. The image number (1) is stuck to the external top part of the box.

There is also a black painted ring, circumscribed in the floor of the room, that limits the play area of the user. In addition, there are printed images from LHC installations, in its corresponding spots (2), (3), (4), (5), (6) also pasted on the floor.

The battery of the computer must be plugged in always.

All the photographs that have troom photos be in the installation room are attached in the "*room photos*" folder.
